

# Modifying translations

Translations which you own can be modified if required, for example if you want to regionalise an existing translation by modifying certain individual translations. To modify a translation that you own:

1. Show the admin page by clicking the **Admin** link in the page navigation menu.

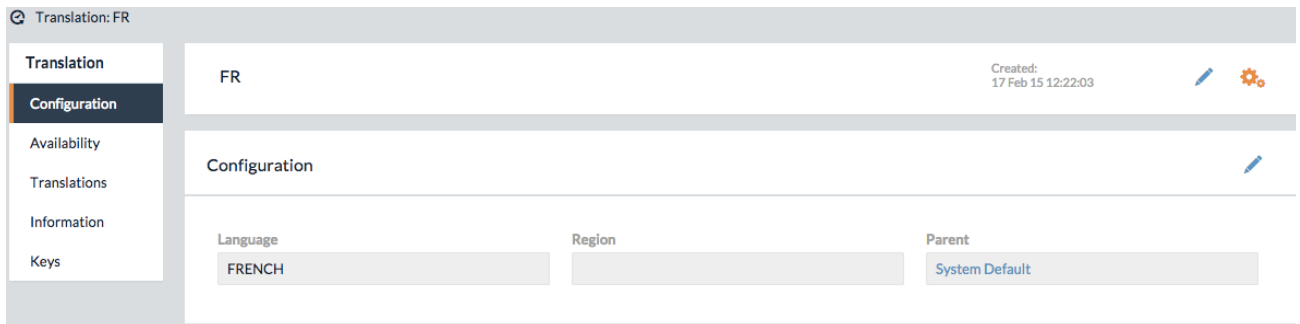

2. Click on the **Platform** tab.

3. On the Translations widget, click on the name of the translation you want to modify.

The Manage Translation dialog is displayed.

4. Click on the **Translations** sub-tab.

A list of the individual translations in the translation is displayed.

5. Do one or more of the following:

Translation: Example

Example Created: 12 Feb 15 11:50:36

Translations

**The string's value in the parent translation is shown in the Value field if nothing is entered.**

**Click to save your changes**

**Revert value in Value column to its last saved value**

**Edit a translation by entering or amending text in the required Value text box.**

**Remove the individual translation and replace it with its equivalent in the language this translation is based on**

6. Once you have finished modifying the individual translations, save your changes and close the list of translations by clicking the

button.
